

# Quick Grave Stone Locator

Until this time there has been no easy to use stone locator for this cemetery. The church office is no longer here and is not always open. St Clement has closed and other parishes have merged in. Using the diagram below and the coordinates listed above in the Index will give you the location of any stone within a foot or so. (I plan to add these coordinates this summer because at the moment the area is covered with snow.)

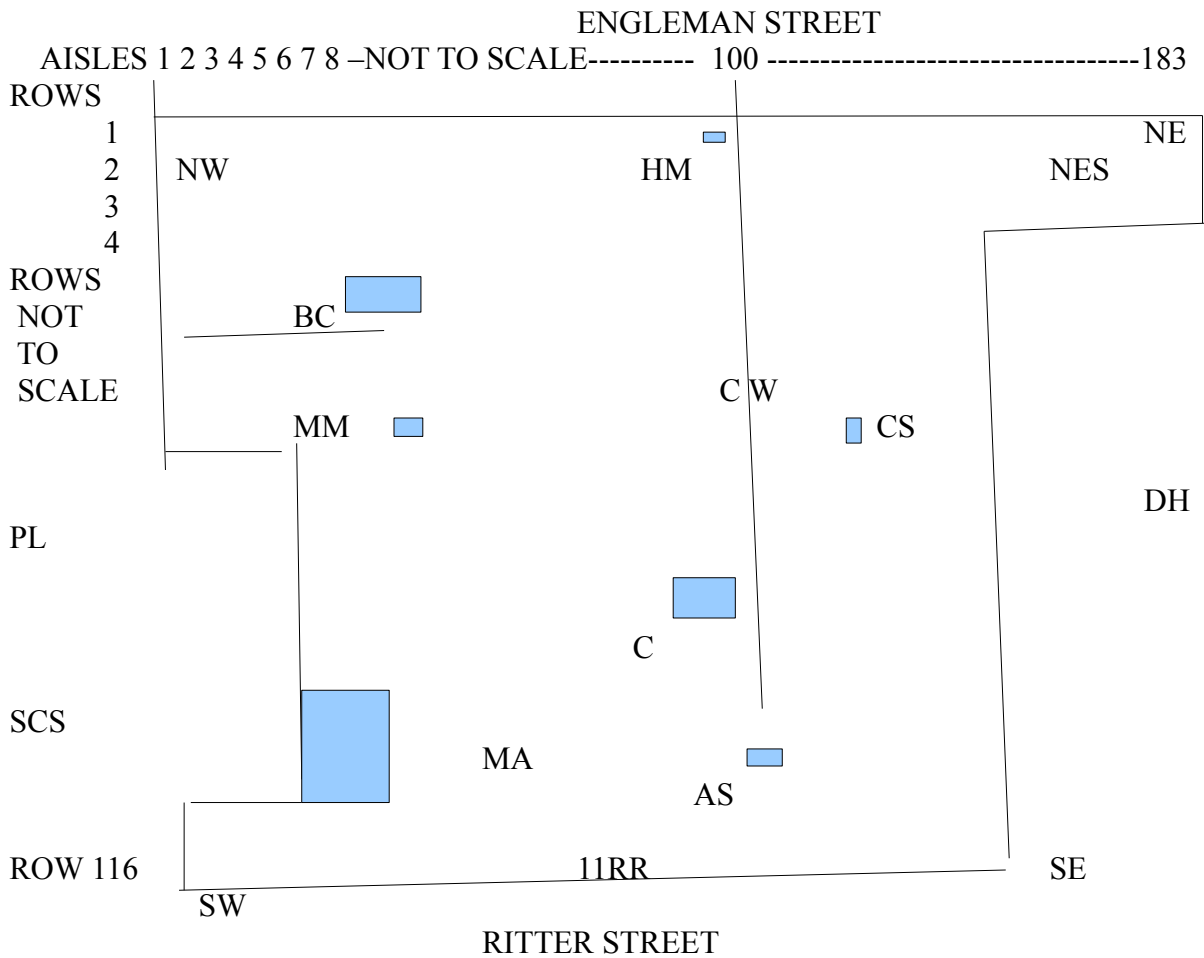

This cemetery is basically a rectangle. Engleman Street is it's longest side and that is on the North side which will be the top of the map as in standard map layout. The St Clement School parking lot is on the West side which will be the left side of the map rectangle. The Dunn Home is at the far right side which is East. Ritter Street is the South border.

On the Index the coordinates of all stones which have been located are listed in two ways  
 First by Row and Aisle location in yards from the top left (NW corner of the cemetery.)  
 And by GPS coordinates for those with this feature on their smart phone.

Using the cemetery historical marker as an example: physical location is WE row 5, NS aisle 98  
 Think of the cemetery as overlaid with a grid marked in yards. NS row is the first row down and aisle 1 is the first row starting at the far left which is West.  
 Since the Marker is in a row 15 feet south of the top, that is row 5 because each row is three feet  
 Since the marker is 296 feet from the West side of the cemetery it is in aisle 98  
 Instead of pacing out or measuring out the distance one could use the GPS coordinates from their cell phone or use a landmark. I am including on the next page a list of prominent landmarks and directions to easily get to them. In that way you will know the general location in the cemetery and should be able to follow the directions to the closest landmark easily.
