Or you can use this to **learn other languages more quickly** by substituting the second word with the word in the language you are learning. This is based on scientific research and has almost 1100 words which can **provide better than 90% understanding of most conversations**. For more Information go to [theeasiestlanguage.info](http://theeasiestlanguage.info). See the free book there International Vocabulary. This vocabulary also helps students learn English as 650 of the words have are close to an English word with a similar meaning. Such as: **FRAT** brother like fraternal, **VERD** green like verdant and **ESPER** hope like esperance. **It can also help students learn English or any language as it has the most commonly used words in common human conversations.** This language can be learned in 1/10 the time as any other language because: **half of the words are similar to English words in meaning;** all verbs are regular, **the present, past & future ending of every verb in the language can be learned in a total of 2 minutes;** grammar has **only 16 rules with no exceptions;** no genders or idioms to learn; All words spelled as they sound and sound as they are spelled with each letter only having one sound. Other languages have 85 or more verb forms and dozens of irregular verbs & hundreds of genders and idioms to learn. English has 1400 rules and exceptions plus hundreds of irregular spellings and hundreds of duplicate words with ambiguous meanings. All of this takes much time to memorize. Because **this vocabulary builds words by combination and by adding prefixes and suffixes, thousands of words can be created without having to memorize them in advance.** Scientific studies show that a basic vocabulary of about 850 word roots is equal to over 6000 English words and easily forms many meanings, providing 85-99% understanding. This cannot be done with English, as English requires over 6000 words to cover 90% understanding because of its irregular word formation and ambiguity. English has over 8,000 idioms and thousands of irregularities and exceptions.

The vocabulary is **based on research** and designed to provide maximum understanding in a minimum of time. It does this by eliminating thousands of needless memorizations required by all other languages such as: thousands of genders, irregular endings, irregular verbs, inflections, duplicate words, irregular grammar rules, irregular pronunciations, irregular spellings, irregular accents, idioms, and thousands of exceptions.

Every human being should be able to communicate with every other human on this planet but most cannot because of the tremendous language barriers of over 1000 languages in the world. With International Vocabulary everyone wins. Everyone can still speak their own native language while being able to communicate using international words.  
The inter-language vocabulary makes inter-language communication easily possible in a short time to all humans. More people can learn it because it makes much less demand on time for memorization. It is not meant to replace any language rather studies show that once IV is learned it facilitates learning other languages. **This inter-language vocabulary provides the opportunity, and most time-efficient potential way for every human to be able to communicate with every other human on this planet.**
