Heroes

Many people today have no idea of the pain and suffering that these men went through so that we may enjoy freedom. This is about remembering our heroes to future generations

“**Paul Gordon Hazen** was the son of Adelbert G. Hazen (Center Line Mayor 1954-1960) and his wife, the former Leona Borsekowski. Paul was born on Sept. 7, 1944 and in 1965 he was drafted into the U.S. Army. On Dec. 4, 1965, SP4 Paul Hazen began a tour of duty in South Vietnam that ended on Sept. 23, 1966 when he died of multiple fragmentation wounds suffered during hostile action. He was the first Center Line soldier to die in the Vietnam war.” Research by Mike Grobbel

Snow Larry Center Line High School graduate. **Real American Hero Served our country in the US Army for 21 years.** Was awarded about 50 medals including Silver Star, Bronze Stars, Purple Hearts and many other distinguished medals and awards. Saved many lives. Top rank SSG E-6

The Vietnam Casualty list.

There were many more who died (nearly 60,000) or are missing in action (2,255) from all over our country.

War against Islamists

On 9-11 2001, almost 3000 innocent Americans died in four suicide bomber attacks and the 2nd on the WTC (the 1st was 2/26/93 also by them which injured over 1000 people).

We have actually been at war with Islamic terrorists since the first attack on the World Trade center in 1993 making that **now almost 30 years** and at the needless sacrifice of thousands of our young people.

With over 50,000 casualties and no end in sight.

We Americans feel it is wrong to kill innocent people who have not done anything against you in times of peace. But hundreds of people have been killed in public places and also many suicide explosions prevented such as: Times Square bomber who could have killed hundreds; May 1, 2010 – 2010 Times Square car bombing attempt, New York, New York, USA. Faisal Shahzad, an Islamic Pakistani American who received an American citizenship in December 2009, attempted to detonate a car bomb in Times Square. The underwear bomber who set off a bomb over Detroit. If it hadn't have fizzled and other passengers took action hundreds could have been killed in Detroit. Also a shoe bomber who was caught. Several other passenger airplane bombings have killed hundreds. Still some manage to kill many. An educated American Muslim Nidal Malik Hasan killed 13 and injured 43 while shouting God is Great on November 5, 2009. This man was a well educated American Muslim who had earned several college degrees. But he followed the dictates of his religion in the Quran to kill the non

believers. BE AWARE SHOPPING MALL, FOOTBALL GAME AND TRUCK BOMBINGS ARE BEING PLANNED FOR PUBLIC PLACES. **Examples: The Boston Marathon Bombing or the Texas shopping mall massacre** April 15, 2013. – Boston Marathon bombings. Two Muslim brothers, Tamerlan and Dzhokhar Tsarnev, planted two bombs near the finish line of the **Boston Marathon. The blast killed 3 children and injured 183 others.** But could have killed many more. The bomber admitted he was ordered to do so by commands in the Quran

A Center Line multi war hero Victor RaCosky spent about 40 years in the Marines and achieved the highest rank. He served also in embassies and saw first hand the abuse of women in Islamic countries. They would also put bombs on children and send them to Americans and tell them we would give them chocolate. Then some Americans were killed trying to get the bombs off of the children.

And worse Islamists are continuing to obey the commands in the Quran to “Slay the non believers” here and around the world because they believe they instantly go to paradise when they do.

U.S. Secretary of Defense General James Mattis stated We have thousands of armed jihadi terrorists here in America. **158 Americans have been killed here in 53 Jihadi attacks since 9-11.**

Vietnam Civil War almost 10 years long

1964-1973 Almost 9 million service personnel were mobilized, at least **58,253 were killed** some may still die of their wounds yet. 53,303 were physically wounded. Thousands were mentally wounded.

There are 591 American POWs..

Nearly **600,000 other people died**. I served during this time. If you didn't volunteer there was a good change you would be drafted. When I got home I was insulted and made fun of. Many vets had their lives wrecked. Many of us still have nightmares and flashbacks. Can you imagine what is it like having to pick up up your best friends body parts and put them into a body bag? Many have cancer and other problems related to this needless war.

Vietnam Center Line and Warren area list Note many others came home wounded physically and mentally.

Korean War 1950 - 1953 1609 Michigan boys were killed POW deaths 8,000 Killed 54,246.USA
We do not have a named list of those heroes who served and the many who died but we do honor them.

World War II Huge disaster for human kind. was a global war that lasted from 1939 to 1945. It

involved the vast majority of the world's countries. World War II was by far the deadliest conflict in human history; it resulted in 70 to 85 million fatalities, a majority being civilians. Tens of millions of people died due to genocides (including the Holocaust), starvation, massacres, and disease. (Wikipedia) Hundreds of Center Line and Warren Area citizens served, helped, died and were wounded. Too many to list here. Now in 2022 most of them are now deceased. We honor them as heroes.

Abel and Sarah Warren Pioneers Abel Warren was a pioneer Christian circuit preacher and war hero who became particularly beloved to the early pioneers and was held in very high esteem so much so that the area near the future village of Warren was called Abe's circuit or Warren's circuit. The area was later named Aba Township and on March 26, 1839 it was renamed Warren Township.

John W Kingscott is buried in Warren Union Cemetery. He was an early Warren township official and was listed in the official 1850 US Census as a US soldier. In those days the life of a US soldier was often one of suffering and sacrifice. That is why he should be listed on a historical stone. Otherwise he will be forgotten. The marker with his name on it was stolen.

Much of the following research was done and Transcribed by Robert and Cheryl Allen. They have done a lot of other historical work and we owe them a dept of gratitude. Thank You

Adolph Brawn was pastor of The Center Line Baptist Church helping it grow then the church became Redeemer on Hoover just North of 11 Mile. This man was a positive force for the Center Line Community and for our area. He also helped many people personally including this historian.

Paula Lumpkin Presley

Graduated from CL 1956. Attended second year that MACC was established. Got married, raised a family, was a legal secretary for about ten years, got BA degree at age 45, followed by two masters degrees (history and library/information science). Retired as director of Truman State University Press (published books) in 2002 or thereabouts 😊. Moved around a bit since retirement in Missouri and Illinois

Notable Accomplishments and History of Center Line High School Graduates 1960-1964 This Book is for our classmates and great great grand children. This is one of my 136 books on Center Line-Warren History. **Note this book is being revised now so send me your additions and corrections or be left out because my time to remain functional is short.** This revision is July 21, 2022 **If you want to be remembered by your great great great grandchildren send me some general information about your**

Accomplishments. Otherwise join the majority who will be forgotten. You control what I put in here. This book will be going to The Library of Congress and other historical libraries soon.

My email is wecare@dogoodforall.today

We are writing this history about ourselves and our classmates to see what we accomplished besides just living a life, raising children and acquiring material possessions.

What happened with the kids we went to school with?

Many class members want to know who has died and who is still alive. As of July 2022 70 are deceased of class of 62. Send professor historian Wesley E Arnold your biography so he can put it in our Warren-Center Line Who's Who. So your great grand children can know about your life and accomplishments. We have 6000 people in our local cemetery who have failed to do this, and are now mostly forgotten and no one alive knows much about them. Don't let this happen to you.

E-mail me your Accomplishments. Good parenting of children is a major accomplishment. Those who served in the military or were fireman or police please mention that. If you worked and supported yourself that is an accomplishment. If you went to school after your graduated that is an accomplishment and even more if you used that education for the betterment of mankind. What else did you do that might benefit your grandchildren? Were you an activist for demanding that humans must be humane and cause no harm by their actions or inaction? Did you press for personal responsibility? Did you stay informed on issues and demand corporations stop polluting our environment, and ripping people off with excessive medical and drug charges? Did you call your congressman and demand they work for us not for corporations and to stop wasting our tax money? Or did you waste your life in self indulgence and sitting on your ass being entertained by the idiot box as most people did. Send me an email and tell me what good things you have done so I can put this in your history for your great great grand children.

Based on my many years as a historian most families don't even take a few minutes to jot down their history and then they put it in a shoe box which eventually gets tossed in the trash because the survivors are too busy cleaning up to bother to read things after their older relative dies. Most great great grandparents are totally forgotten because no one bothered to take a few minutes to jot down their history. Tell me or be forgotten. This is going to The library of congress, university libraries, and local history archives.

Many class members want to know who has died and who is still alive. By 2062 we will all be dead. You won't be there to tell your great grandchildren about your life but this book will be.

Deceased are shown in Red. Veterans who Served our country are in Blue.

Alive 2022. means they were alive in 2022 or what ever year they were last heard from.

PRIVACY: Note in this revision I have stripped city and state from all living class members.

Only public information such as: newspaper articles, funeral obituaries, class lists, info from alumni sites, Google, Facebook, city, county and federal records. I show only basic historical items such as (alive or deceased) occupation, married name, accomplishments.. All classmates may send me an autobiography to go here and or also go in the more detailed Center Line-Warren Who's Who. (A series of 25 books of Notable people who have accomplished something for benefit of humanity. And you may include your personal information of your own choosing yourself. **If you want a spouse name removed tell me.**

No disparaging remarks or put downs will be accepted. Just our Accomplishments, what we did for our community, and our basic History, fluff omitted. Example the first person listed below, your historian, earned several college degrees, belonged to many organizations, traveled around the world, was listed in a few Who's Whos and was given many awards. All of this is omitted as it did no good to the community. Also what he bought, collected and acquired are irrelevant. Just paying for a membership in an organization is not an accomplishment so is omitted. That he put his life online to defend the community against a local terrorist cell when he was 73 years old is too difficult to explain so we will call it community service. **We will pick on your historian first and in much greater detail so classmates can decide what they want to include for themselves or not.**

Arnold, Wesley E. Class of 1962. Alive 2022. He served our country in the **U S Army, given medals.** No big hero just a humble soldier who volunteered to serve his country and he got shot at. He was a **Red Cross Volunteer** and taught First Aid, was a scouter and **Scoutmaster, saved lives, had a good influence on youth.** Was a **social worker many years and helped many families.** Then went back to graduate school at WSU and again worked to pay his own way for years of difficult study to earn a Masters degree in Teaching. Resulting in after years of low pay teaching adult education (because he had earned a masters degree and they were only hiring those with bachelor degrees) finally got hired as a college professor.

He was one of the **first to set up Solar Panels (reducing environment harmful emissions, helping our planet,** and got free power for much of his home with them. He now tells others how to do that themselves at very low cost. Best thing is this also makes you independent of the electric grid meaning you no longer worry about power outages and we can always charge up fones. You can also run your TV and laptop computers off of this set up with free dependable electricity. Cost for parts can be under \$300. See his free book **Free Solar Power, Do It Yourself**

He shared lessons to world on Wiki University. **Was a good teacher and college professor (over 25 years as college teacher of Technology) and helped his students giving them useful and practical information.** (combined over 50 years teaching useful topics.)

Wrote and published over 236 useful books, 136 on Local history recording our local history for future generations and helped **preserve our American Freedom and Way of Life.**

Did doctoral work on finding the easiest language for humans to communicate between languages around the world **to save lives and help prevent misery** caused by language misunderstanding around the world. (Thousands of lives are lost yearly) He published free information on international vocabulary to help with understanding between languages and save lives. See **easiestlanguage.info** Did volunteer work in **humanitarian causes.** Gave away for free his local history books he wrote including DVDs to all who wanted one and became known as the humble historian because he spent thousands of hours recording our local history and put it up on a free website. <http://dogoodforall.today> Visit that website.

Or visit amazon.com and select books by Wesley E. Arnold to see just some of the over his 104 books

there, many of which may be useful to you. He tried make them free but Amazon being a business insists on a minimum price usually of 99 cents. But Prime and Kindle Unlimited get them free.

One book is especially worthy and you can read it on your fone to read in spare moments.

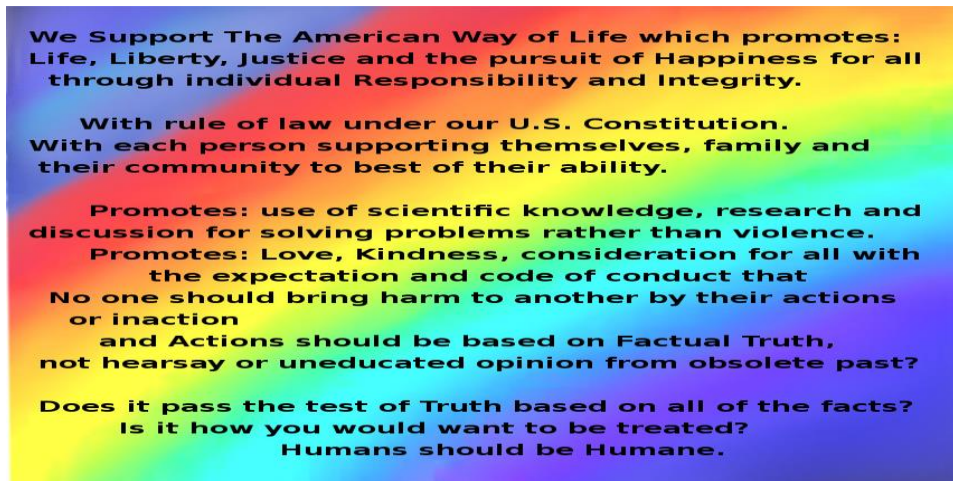

“Be a Success with Proven Success Practices.” This book can save people’s lives particularly teens. Free or 99¢ (or always **FREE** on <http://dogoodforall.today>)

Professor Wes helped hundreds of students get college scholarships and **you can also see dogoodforall.today** Professor Wes also exhibited his Center Line–Warren historical over 208 historical pictures at Hometown Heroes Internet Pub in Center Line and at Fresh Start Coney Island in Center Line for many months. He still teaches Technology Classes at college level but is most active in trying to improve things for all through humanitarian education over the Internet. He states that there are a few important things to learn from history which are (among others) **TOO MANY PEOPLE HAVE BEEN KILLED NEEDLESSLY;**

THE WISEST ACTION IS TO BE KIND AND DO GOOD FOR ALL, but not cause harm by actions or inaction.

HUMANS BEING HUMANE and SCIENCE; with WISE PLANNING & MANAGEMENT PROVIDE the most BENEFITS FOR ALL.

The picture below is what many of us veterans fought for and many died for and we feel it should be taught to all especially young people and new citizens.

Professor Arnold also assembled an Electric vehicle powered by solar power or human power and put out information about how others can do this and save big money on car insurance. Most trips most people make weekly are very short. If a family has two cars car insurance can be cut down or dropped on one but reinstated if needed. This can save people \$1000 a year. And his E vehicle gets free fuel from its solar collector on the roof which can be removed and placed in a south facing house window.

Professor Arnold also did doctoral work to discover the easiest language and published a book on it (now free at easiestlanguage.info) where he displays over 100 of the almost 1000 letters he has received from over 80 countries in this easiest language (Language International) in which you already

know 2,000 words. You can learn it in 5 minutes a day. This enables learners to correspond with pen pals or e-mail pals from all over the world. Oh the easiest language is not English a language that 95% of the world does not understand despite what the propaganda tells you. Except for tourist traps and a few businesses 95% of the people in the world do not understand English and will not bother to learn it because of its thousands of grammar exceptions. But if children of the world learned the easiest language known as International Vocabulary then within a few years thousands of lives could be saved which are now lost due to language non understanding. Example the Ecuadorian pilot who did not understand the towers directions which caused him to collide with another jumbo jet causing over 500 deaths. Or the mother who was traveling when a man snatched her baby and she started screaming for help but the policeman who arrived did not speak English (95% of the policemen in the world do not understand English). Humans need to understand each other in emergencies. So Professor Arnold is promoting it on his web pages and with International language e-mail friends around the world. Visit easiestlanguage.info

Professor Arnold is still teaching college classes about technology and warns students that bots (automated computer programs) are and will be replacing many human jobs without creating new jobs. So we will need to do something about the coming massive unemployment. This can be done by placing solar energy panels on public property (creating jobs) and then putting the profit from that huge amount of free daily energy from the sun into a public fund and give every citizen an equal share. This would create a basic income for all. People could still work for additional income. This would be a win win for all.

Dear classmates, tell us about memorable moments in classes.

Starting off with Old Mrs. Grates homeroom boring but one student approached her outside of class and sold the most magazines ever sold to one person.

It was a cheerful morning in the new Teacher Ann Warren's new Literature class. She read us the purple cow poem then read "My Candle burns at both ends and shall not last the night, but ah my friends and oh my foes, it gives a lovely light.

Then it was to Ex Marine Edward Hipwell's American history class where we sometimes heard real war stories like him waking up on a Pacific island to a big tarantula crawling over him so he pulled out his big 45 handgun and blew it away waking up the whole camp putting them on alert and getting himself in big trouble.

Then it was off to Oz Grobbels English where we gave oral book reports. He encouraged me to speak even though I was very shy. His advice worked and I was surprised that this shy kid had done so well I caught him the next week reading the book I had given the report on. "Masters of Deceit.

Then it was off to Clon John Ruffer's Chemistry class over the lunch periods. He explained not to put too much carbon in a mixture. And When he was called down to the office some of them used that opportunity to do just that and add more of a chemical which of course caused a lot of smoke setting off the fire alarm and getting the student body a much longer lunch. After that Mr Ruffer would pretend to be reading but watch us over the top edge of his glasses. Can't blame him after what happened.

Then Harry Carl Markel's Psychology class. He actually made Psychology interesting. At graduation He took a picture of me and my dear grandfather who raised me and sent it to me all at his own expense. What a wonderful good deed to a very poor kid. I still treasure that picture today. The kids made fun of Markle I don't know why because he was such a kind person.

Mr Mandzera's Algebra II class. Mr Mandzera and I ended up in the same class we were taking at Wayne State University. He was a good student as well as a good teacher.

Then their was Drafting with Mr Hatch who later became a Principal. Found out that the more time I took the better grade I got. He actually carefully graded each lettering and drawing we did.

And at other years we had several very good teachers and a couple that were so so. Art Snook and Mr

Duwieki who seemed to use the paddle excessively at least as far as I felt and I mean felt..

After being sent home to die, Lee was cured from "terminal" cancer, at age 1 1/2, using an herbal formula that was developed by an American Indian, who resided at 8 Mile and Woodward, in 1946. In his 20s, he repeatedly visited the Indian and begged for the complete, five herb formula, which he eventually got and then began healing cancer in others and succeeding! He worked on the mural that stood, on the wall in the hall, beside the principal's office, at Center Line High, in 1960 and it remained there for many, many years before being removed. He has "died" three times and come back! He was diagnosed to die three more and survives still! Also, Lee has survived the many "regular" scrapes with death, the normal teenage near tragedies and more recently a 22 car wreck on I-75. Lee has three degrees and taught and counseled in high school, but mostly middle school, for 22 1/2 years and loved every minute with the kids. With his illness experiences, he has researched disease and now heals, for free, most any illness, but cancer remains his most satisfying one to heal--he has never lost any type cancer "patient" in over 48 years!! Lee has invented a brand new, 100% effective hydrotherapy and a simple, unique sleep system that allows deep sleep in a few minutes and requires only 4-5 hours in bed to totally refresh each night, he's reversed alzheimers, heart disease, blindness, diabetes and many, many other illnesses. For the last 19 years, Lee, a non-gambler, has made a living, and financed his healing and research, by playing casino blackjack and has an e-book in the "works" describing his 90% plus, winning technique. After two failed marriages, Lee has finally found ("Why did you make me wait so long, God"?, he asks.) the "perfect" woman, "meant" for him, who is the love of his life and he plans marriage soon!

Lawrence Linda Diane **Alive 2022.** Married Halifax and Married Billingsley Do you remember the A and P store on Van Dyke? If so you might remember Margaret Lawrence Hairstylist Beauty Salon Across the street from there. My mom and I lived above the beauty salon. Business was good for her and she was able to pay off that building in three years. Despite that she died at a young age of 68 and

had very little. She did die happy though in her beloved Jamaica. She raised me with maids, Cadillacs, nice trips, and lessons in everything. I fell in love at 16 with a young man from Lincoln High who also worked at the A&P store. I finished beauty school just after high school which made it easy to not go to college. Karen Roose and I were all set to dorm together at Oakland University but because I had a career and was in love I chose not to go. My mother was happy since I was an asset to her business. Getting Married and having children was always my goal in life which she never understood. We had three handsome sons with his blue eyes and for ten years we were, to my estimation, quite happy. After fourteen years he left. He was a good provider and I loved him so much. He broke my heart. I had been going to Macomb for Medical Assistant classes when he left. I completed that, living at poverty level. He was faithful with child support and with doing hair in my basement and renting out a room, I was able to get accepted and complete the RN program at Macomb. It was not easy to get into the program but once I got in I did very well. My children were 11,9, and 4 when he left. I rented a room to a sweet lady who shared my love of nursing. She was glad to have a family and she watched my youngest child while I went to school. She was my angel.

After five years of working and gaining confidence as a single mom, I met my now husband of 30 years. We settled in Sterling Hts for ten years and his retirement age I developed lung cancer. So after working 14 years, mostly in ICU at Macomb, we retired in Evart MI near Clare on a little lake called Lake Miramichi. All through my life my church was very important to me. I don't think I could have stayed up north if it hadn't been for our church. They are family to us. So I am 71 now and Richard is 76. He is a trustee at our little church and keeps very busy since retiring from Ford Motor. Our retirement years have been good.

My maiden name was Linda Diane Lawrence. I was born in Highland Park but when I was around five years old we moved to 19959 Revere near Outer Dfive. At about age 10 my mom built a beautiful building across from the A& P store on 9 1/2 mile area of Van Dyke. My claim to fame was being her daughter. She moved her and I above her beautiful beauty salon so I could be near her. It turned out to be very lonely for me as I went to Trinity Lutheran school on Chapp St and most kids were not from the neighborhood. I had all kinds of lessons to fill my time but it wasn't until Center Line High that I met my lifelong friends.

I followed my mom in the business and graduated from Beauty School when I was 17. She sent me first advanced training and I built a nice clientele quickly. I had taken college classes in High School and was accepted at Oakland University and MICHIGAN State. Having a good job with my mom made it an easy choice to not go to college as I had already fallen in love.

. Stayed single till I was 33 and met the love of my life and Married #3. in 1977, third time was a charm working on the 43 year now. Moved to Oregon in 1978-1982 Arlington Texas 1982-1984 Back to Phoenix 1984 till present DROVE to Alaska twice and stayed 3 months each time and fished! Union Carpenter from 1978-1991 Dam Inspector 1991-2009 Only this time God was part of the equation; been Married now for 40 years and going to Hawaii this summer. Have children and grand children.

Retired. What prompted me to retire in 2009 was that I gave my wife one of my kidneys (perfect match) in 2008 just before I retired and I had a stint put in 2 years ago, other than that we are fine and blessed to still be here.

Have traveled thru out the US & Canada Merna and I have enjoyed serving the Lord since 1977 and will continue to do so until He calls us home.

We live in sunny Phoenix Arizona for the past 25 years. Have a Granddaughter that lives in Madison Heights Mich. She is 18 and going to school to be a Vet. (loves animals).

Sounds like you have been keeping very busy, thank you for all the stuff you have done over the years it has helped many people. Thank you also for your service to our great country.

I think I could write a book with all the crap that I have been thru, but as it is we just share with as many as possible God's Love and Grace that He has shown to us. Doing fundraising for an Orphanage in Kenya. I wrote a book (Repent, Receive, and see the incredible Things God Can Do) This is a story of my life before and after receiving Christ into my heart.

FYI The book will be out in December at Barns & Nobel etc....

That's about it for me be safe and take care of you!!! Tenderized by His Love Mercy and Grace....Larry & Merna Neumann

Pilgrims Progress. Movies Nancy likes include The Lincoln Lawyer, The Bucket List. TV shows Nancy likes include The Good Wife, Chicago Code, Detroit 1-8-7. One of Nancy's favorite quotes is: "I might have been born at night, but not last night".

Orlikowski Benny Alive in 2018 **Accomplishments unknown.** Married Diane worked at Chrysler 15 years as auto designer

Orton Diane Kay **Alive 2022.** Married Gus Haynes of Center Line had kids later Married Charlie Gieger now deceased. Went to college and Beauty School. Here is her story she put on Classmates. "Life I RETIRED. And, I'M LOV'N IT!!! I'm an artist, crafter, and Gramma. The last being the best. I still live in Center Line. In fact, my two sons graduated from good ol CL also! I did not go to the last reunion in Vegas. I think the Class of 62 was a truly unique group. Just barely 'baby boomers' so much has changed since we were growing up. We were innocent beyond words, not quite ready for all the changes coming into our 'simple' lives. Gosh, just think... us girls didn't even have birth control pills! And girls were required to wear 'skirts' until the last years of high school. (I think that's when 'the men' were in total control) Like many of the girls in my class, I Married early, way too early, was not prepared for adult life, the marriage ended in divorce. Became a single Mom, and bungled my way through a great deal of my life. Somehow, we all survived, and actually laugh at our 'family' experiences. Ghee, can you believe my boys are still alive? After all, they either stood next to me on the seat in the car, or bounced around in the back seat, with many threats of "If i have to pull this car over". This computer is new for me, even after 2 years I'm still trying to figure it out. Would love to hear from anyone from the 'Class of 62'. Go Panthers, Bi-County Champs, Four Years In A Row!"

Robbins William James Alive in 2022 graduated from Ferris Univ. with a B.S Degree in Science

Education. At Fraser Public Schools, I taught Biology, Physical Sci. and Chemistry for 34 years. In 1966 I Married Doris Seybert[class of 1964 CLHS], 3 years later we had the first of two children[Coreen & David]. In 1975 I obtained a M.S In Science ED. Having thoroughly enjoyed 34 years in teaching we retired to live on the beach in Delaware, where I again got involved in teaching Physical Science and Chemistry for 6 years. During my last 2 years in Delaware, I along with two other colleagues, developed a program in Physical Science that is now used in most High Schools in DE. After retiring again in 2006, Doris and I decided to move to Rockford, Michigan to be close to our children and grand kids [2] and have been enjoying them thoroughly. They are 3&5 in 2008. Ribbing William served his country in the US Coast Guard for 20 years retired in New Orleans as a Warrant Officer in 1982. Earned Masters Degree at William and Mary. Hi Wesley, You can add a bit to my historical record. Spent 20 years in the military, and 13 months in Vietnam 19 miles from the DMZ, became a Warrant Officer, retired and taught Nuclear Physics, Radiation Safety, After retiring from the US Coast Guard, I remained in New Orleans. I had already traveled half way around the earth and back. I became Quality Assurance Manager for a private Company, and started My Own Company named BR Industries, Inc. providing services to the contract companies servicing Avondale Shipyard while they were building five Navy Ships. My contracts included all five ships.

Upon completion of the contracts, I accepted a teaching position at New Orleans Regional Technical Institute providing students with a career in Non-destructive testing of metals. I obtained a teaching Certificate, and a Nuclear Materials handling license for the institute, and as Radiation Safety Director for the Institute, I taught, Radiography, Ultrasonic, magnetic particle, and dye penetrant, testing of metals and welds, and wrote the state curriculum for the position in All Louisiana Technical Institutes. My course included Nuclear Physics and Radioactive Materials Handling and Safety. Most of the students, upon graduation, obtained jobs in the Non-destructive testing companies providing a service for the petrochemical companies x-raying oil pipeline welds offshore, or equipment maintenance in the Oil and Chemical plants around the Gulf of Mexico.

I was then hired into Management of one of the Non-destructive testing Companies, and held Radiation Safety Classes as Director for several Companies. As time went on, I found myself as Head of Quality Assurance for A Steam Turbine and Rotary Compressor Company that is internationally known in the Power Generation and Petro Chemical Industries in New Orleans.

Working for them, I was able to have a specific Ultrasonic Testing Procedure that I developed, published in the American Welding Society that became widely used in the industry. I was also able to create the documentation and procedures required to obtain International ISO Certification for the Company.

I finally retired a second time at the age of 58 and moved to Wyoming. Four years in the -40 degree winter temperatures with blinding snow storms, provided me with the incentive to return to Pensacola, Florida where I remain to this day.

I have six grown adult kids, (Five boys and one girl) and 13 grand kids and three great-grand kids. I have been fortunate to locate my father’s family in Sweden and learned of my Swedish Heritage, and spent a two week vacation traveling around Sweden meeting all my relatives in 1996, and we

maintain communication to this day. Our family count is over 115 persons, scattered from Australia, throughout the United States, Sweden, England, The Netherlands, Vietnam, Spain, and Ireland, and growing larger every day. My latest goals are plans to revisit many of my past venues and maintain family ties and visits across all locations where family reside. I am now the eldest Family member, so my historical records need to be passed down to the next generation. Lives Pensacola FL

Stahl John '61 **Alive 2022.** Graduated U of M in Psychology, tried Peace Corps, **Served US Army** as a Clinical Psychology specialist San Antonio Texas and Kansas. Got teaching degree taught elementary grades. Became Wayne County Probation Officer and State of Michigan Probation Officer retired from this after 29 years. Likes trimming Christmas trees at a tree farm. Does volunteer work that helps keep lead out of our water. Is a recycling technician working with computer parts. Helps others. Has grand children. Married Andrea. Lives Warren Michigan. Just received this update. I, John Clayton Stahl, was born in Detroit, Michigan, and moved to Center Line when I was eleven. I have worked as a laborer, helping to pour concrete driveways for an Italian neighbor of my sister, Susan. My boss is now a multimillionaire. I later worked as a Probation Officer in Detroit and retired in 2001. While working

there, a fellow probation officer and his wife decided to start a Christmas tree farm and he needed some part time help to plant, prune, and during a drought water his trees. With three children as well as their beautiful (not exaggerating) wife to support I was glad for a chance to earn some extra income. On both the laborer job and tree farm jobs I was paid a small fraction of what I earned as a Probation Officer, getting a salary enhanced by Union bargaining. From my tree farmer boss, Frank Genovese, I learned to prune Christmas trees and I got a loan from my credit union to invest in a Saje Shearing machine with an 8 ' foot blade. Gradually, I was able to work for enough tree farmers to prune trees for to make almost as much, hourly rate, as the State of Michigan paid me to supervise a caseload of Felony Offenders on Probation. Frank Genovese, God rest his soul, became the owner/manager of Candy Cane Christmas Tree Farms in Oxford and Lapeer, MI and a multimillionaire as well. So contrary to what you might expect from performance in 2 world wars, I, a great grandson of German immigrants, have not become a millionaire (by a long shot), but have worked for two Italian sons of Immigrants who did. At age 76 I now reflect that their willingness to risk investing in themselves and do the work that it takes to get a job done made them rich. I am immensely grateful for the skills and wisdom that I learned from both men enriched my life and I do not begrudge them in the least their enjoyment of the fruit of their labors. I humbly suggest that those young people of today who would seek to discredit this country and debunk our capitalist system would do well to examine the alternative nations and systems with as critical an eye. As Jordan B. Peterson suggests in rule 6 of his bestseller, Twelve Rules for Life: An Antidote to Chaos, Set your own house in perfect order before you criticize the world.

Tanner James Russell Alive in 2018 Married Christine.

Dr. Thelander James Edwin **Alive 2022.** Married Pierette **navy submarine service teaches electronics for Utica schools, Ltl League coach is now Dr Thelander** enjoys antique cars, fishing, camping His resume is astounding and shows he is easily our most outstanding classmate. Below is a short version of my 6 page resume. "All fact, no brag".

We are down in numbers since I last served, due to things beyond our control. (Down from 1200) On the bright side we do have a lot of dedicated members, serving ALL the youth, not just the academically inclined. When I was in high school my teachers never mentioned MITES. The only competition available to us was the American Society of Body Engineers (ASBE) – drafting. Which I entered, finishing up my drawing on the living room floor with a small drafting board to get it in on time.

I think we are the only group giving a real "head start" to all youth. Where else do they learn to PRODUCE?? Not in English, history, chemistry, or French, right? We are a nation of "producers, innovators, inventors, etc. In OUR classes they become a much sought after commodity: young people with marketable skills – BEFORE they even leave high school. Where else do they learn "cooperation" in the work place, how to work together. We are a nation of "producers", that is how we became #1 in the world. Producers will always have a JOB. Our students get to "create something

tangible”, that is useful and long lasting. The plaques they get will be on the wall for years, as are my sons’. One is a GM test engineer, one owns a successful construction company, and one is a retired Navy SEAL and is running for Congress.

This year we did some political action and got members of the House and Senate to come down and visit the project floor. . A few years ago I met with my State Rep and Senator with the MEA. He did visit the MITES Student Competition when we just had in Lansing. He offered up \$50K, I had asked for 40K.

We had some more legislators show up as many of you answered the call and asked your legislators to visit the competition. So your efforts paid off – called “teamwork”. Your efforts will pay off literally in the future when we ask for their monetary support.

In the past we’ve received money from both Ford and GM, we can look into reapplying as well.

Working together we can do some rebuilding, and filling of vacant positions. Most positions do not require more than 5 – 10 hours a year. Vacancies don’t look good on the website when potential supporters are checking us out. So I will be looking for volunteers. Maybe we should look at combining some positions. On the positive side school districts are more likely to approve the expense of sending members to the convention if they have a job at the convention. And if any member has to go through a hassle to get release time to attend, along with picking up some expenses, I would be delighted to speak with them. Hopefully, as we can count it as “in-service training”, that should be enough to get approval to go to the convention.

Part of our rebuilding effort needs to be “RECRUITING”!! At least in two avenues:

1. Former members – reach out to them, get their concerns and we can work on resolving them. Tweaking this and that.
2. Make sure that they and all members have access to come to the convention – meaning release time and some funding. If there are districts that can’t afford to send their instructors to the convention for in-service training, we’ll work on them, politely. If they can send science and English teachers to “in-service” training, they can certainly send ours.

The student competition continues to be impressive, since 1928. Together we can make it last well into the next 100 years. If we need to write up an additional guideline, or tweak some for various aspects of our organization, we can do that. It will serve to keep us on track far into the future. But I think the blue book does a good job. I’m thinking more of everyday operations.

Suggestions will always be welcomed, as will any assistance desired to develop them.

Arguably, I'm in my right mind; can't walk and half talk. My beautiful wife of 47 years has been a God-sent. I'm in an electric wheelchair and have a mini-van with a ramp. My wife is my Chauffeur. I Married the former Barbara Ebert of Onaga, Kansas in October 1968. We were Married in Onaga. We have 5 daughters, 10 grandchildren, 2 great grandchildren. We spent the first few years of Married life in restaurant management. The last several years, until retirement, in van conversations. I was a factory representative for a small company in Mississippi. I've been retired since 2006. Had my first 2 strokes in 2007. Then the big one in 2012. That was the stroke that almost killed me and put in the nursing home. To answer the question "what have you done with your life?", I'd have to say, it's been my life as one of Jehovah's Witnesses. There's no substitute for knowing the truth of the Bible. It's awesome to see the big picture of Jehovah's purpose for the Earth and mankind. I just wish everyone could see it, but they can't. (2 Corinthians 4:8) I have to wonder if any of the class of '62 are now Witnesses of Jehovah. Lived in Waverly, TN

68 DECEASED IN CLASS OF 62 THAT WE KNOW ABOUT but there are probably more because no one reports them. By 2060 everyone in this entire document will be dead and unless a history is done they will be forgotten. This is why I offer the opportunity for every class member and their family to place a biography here and in my 25 book Who's Who of Center Line-Warren History. In this way great great grand children can read about you as these books are going to Library of Congress and other historical libraries.

Most great great grandparents are totally forgotten because no one bothered to take a few minutes to jot down their history. Tell me or be forgotten. This is going to The library of congress and local history archives.

History of classmates from other classes

This is a work in progress. We went to school with over 1040 students. For most of them their history reads. Went to work. May or may not got married. Had sex which resulted in a child. (Was that an

accomplishment? Not in my book.) But if they were a good parent and instilled good values and helped their kids, that is a great accomplishment. Worked at several jobs as opposed to being a couch potato on welfare. Common accomplishment. Got some additional education. Watched thousands of hours of TV for entertainment. Went to many movies. Went on some vacations. Traveled some. Lived in warm states. Fine these are what most in life have done and this life is about to be over in just a few months or years. But there are outstanding people among our classmates that really did accomplish something more than this commonality. They helped improve things for their grandchildren, they helped improve things for a better future. Some went into occupations that made a difference and even saved lives. Some served in the military. Some were informed and were activists for positive change. These are the things I want to hear about not that you fathered x number of children or belonged to the Moose Lodge or ate steak in Switzerland like I did. (The last item impressive, perhaps but an accomplishment? not in even my own book.)

But here are some accomplishments from classmates of other classes:

Hanselman David Deceased 2017 class of '60 provided employment to many persons in his tire business, did years of service to the community through the Lions club, served his community as a Center Line City Councilman and **Mayor. One of George's favorite quotes is: "Once you see death up close, you know what life is... The only thing better than a good friend is a good friend with a bag of M&M's. Let your light so shine before men that they may see your good works and glorify your Father which is in Heaven and whatsoever you do in word or deed, do all in the name of the Lord Jesus. Happiness is not coping with the storms of life... it's learning how to dance in the rain. Steady as a preacher free as a weed.". More about George:" Lies don't impress people, honesty does....Anger is like drinking poison and expecting the other person to die...When your pushed shoving is easy...O God, help us to seek you always, in times of sorrow and in times of joy. Sometimes I feel as cold as steel, broken like I'm never gonna heal. May I never do anything that causes me to be ashamed of myself ...I will be 67 years old on July 16th . I hope to live many more years. But the prospect of death holds no terror for me. I have loved and been loved. I have been challenged in my life, knowing that some of what I have thought and done will live on in others. It's only when you are no longer afraid to die that you are truly alive. This can be, because I have Christ in my heart. With love always and forever,

Passed away peacefully at her home in Kentucky today, after a long battle with cancer.

She married Francis Henry Kaminski Jr in March 1967. They loved riding motorcycles in their early years. In 1979, moved to Dryden Mi on a farm where she raised sheep for 40 years. In 2012 she moved to Kentucky to continue her dream of being in the beauty of the land raising her sheep. She was a self-taught weaver and antiquarian, she had many talents from sewing, furniture refinishing, crochet and knitting. She was a self-described 'old soul' that live way past her time.

She is survived by her children Rebecca (Daniel) Szymanski, Dryden MI, Micah (Danielle) Kaminski, Hopkinsville, Kentucky, Tracey Macauley, Michigan. Grandchildren Andrew (Elizabeth) Weisenberger, Jordan Kaminski, Nathan Kaminski, Bella Szymanski, Liam Szymanski, Deric (Heather) Boismier and Margo Boismier. Great grandchildren Grayson Mann, Kylee Machalak, & Noah Machalak. Her siblings James (Joyce) Shorek, Marion Carson and Elizabeth Moore.

She is preceded in death by her husband Francis Henry Kaminski Jr, Mother Marjorie Shorek, Father Leonard Shorek and Baby Sister Heather Shorek. She will be cremated and a celebration in life will be announced at a later date.
